Ambassador Login

Internal server error on pay forecast and payments tab (under ambassador login)

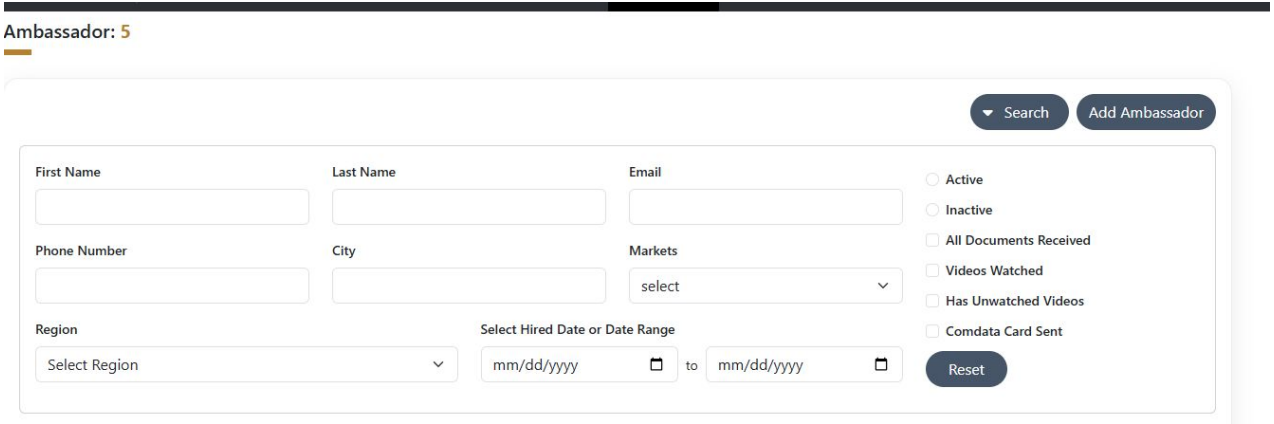

Admin Login

Instead of scrolling through the dropdown - have an option to type in each filter (ambassador name, email, etc.)

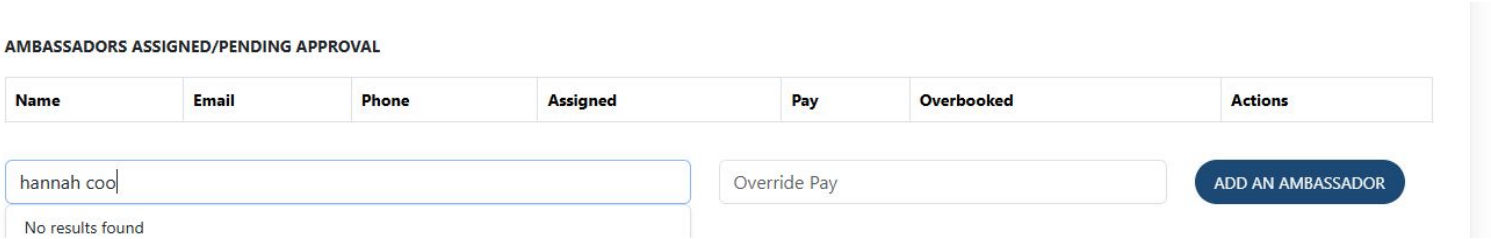

Admin Login

Missing a ‘state’ filter option on ambassador page

Admin Login

Being able to type BOTH first and last name in the ambassador section of the event and having it pop up

This is SO helpful!

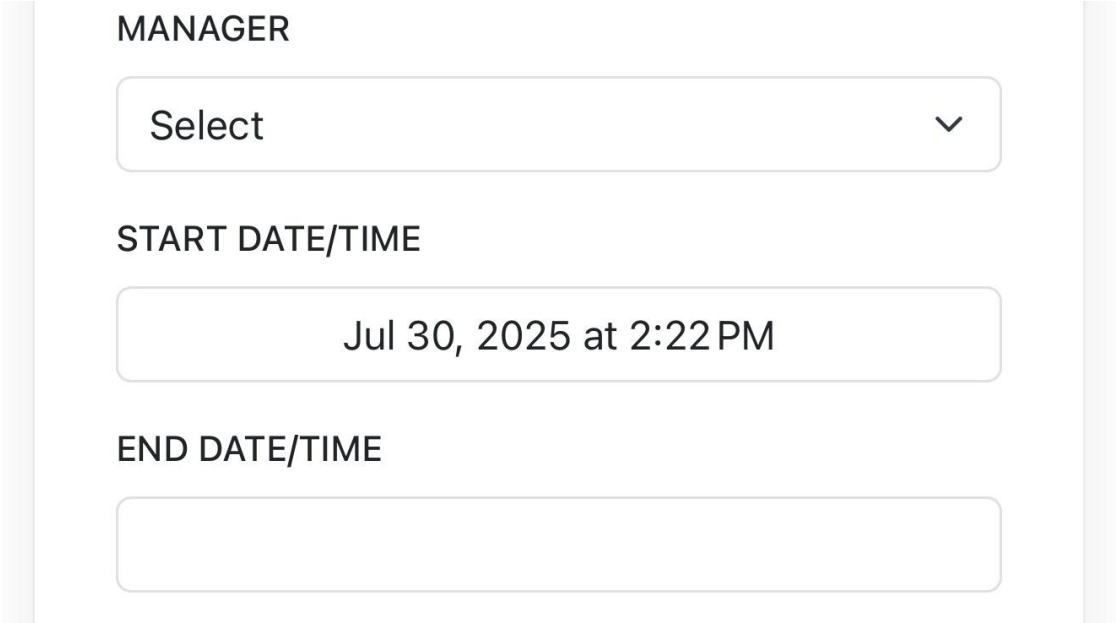

Can we adjust 5’s for the minutes?

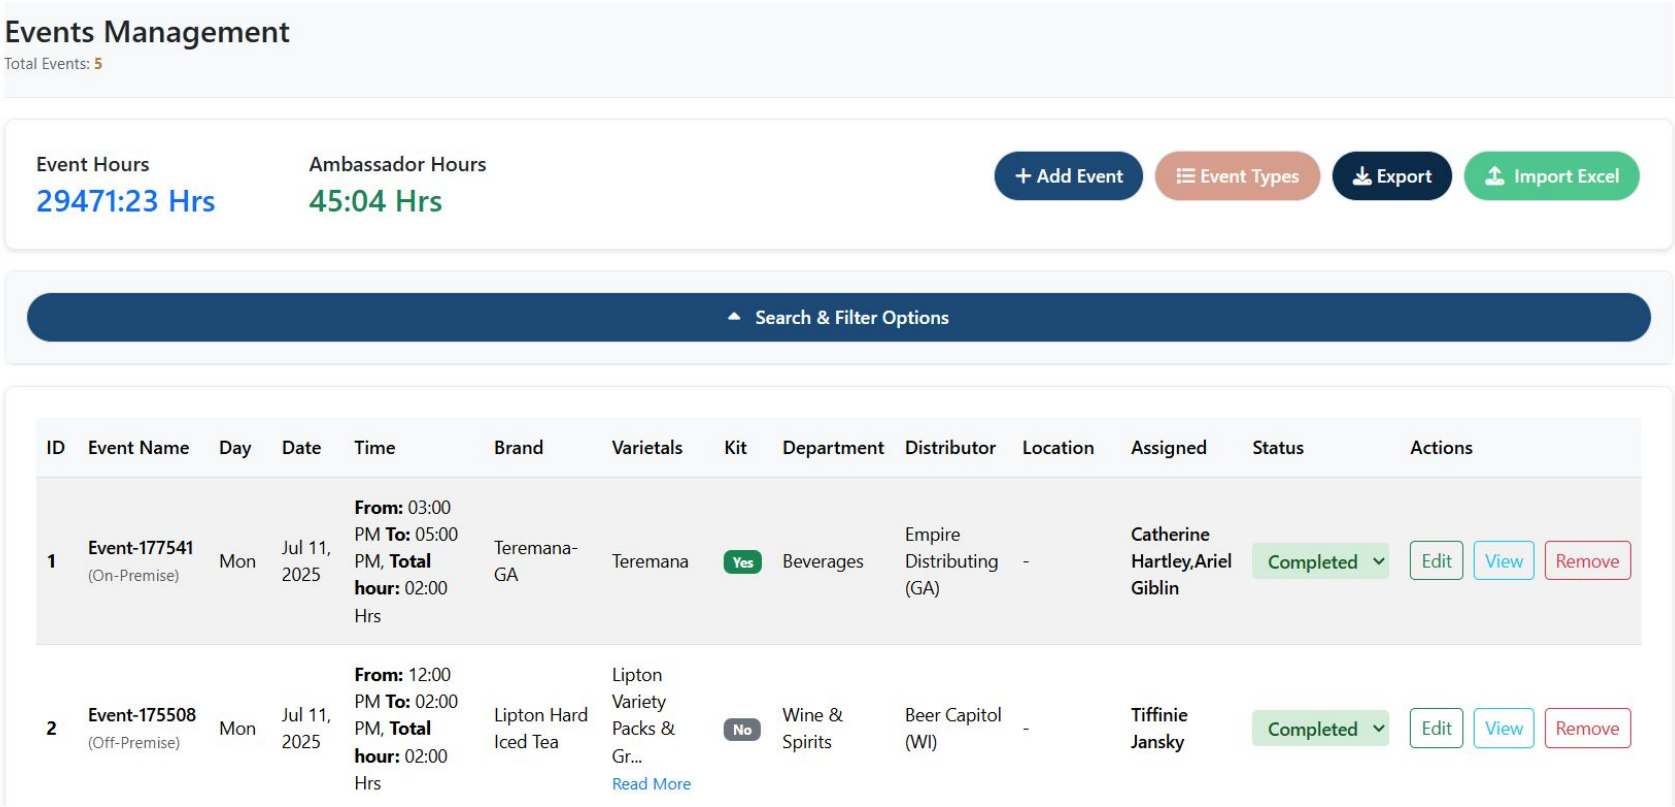

EX: 5:05
5:10
5:15
ETC..

Need button to choose time zone (EST, CST)

Can we have it where completed events don’t show up right away, similar to now where you have to hit “show completed”

Why is there an event ID, Event Name (not on our portal currently), and Brand?

ID	Event Name	Day	Date	Time	Brand	Varietals	Kit	Department	Distributor	Location	Assigned	Status	Actions
1	**Event-177541** (On-Premise)	Mon	Jul 11, 2025	**From:** 03:00 PM **To:** 05:00 PM, **Total hour:** 02:00 Hrs	Teremana-GA	Teremana	Yes	Beverages	Empire Distributing (GA)	-	**Catherine Hartley,Ariel Giblin**	Completed	Edit View Remove

1. Type is showing up store names
2. For Venue can it include the full address with the store name and can we search by address (i.e. 1234 if that is the address numbers)

Can we add an option to Message multiple Markets at once?

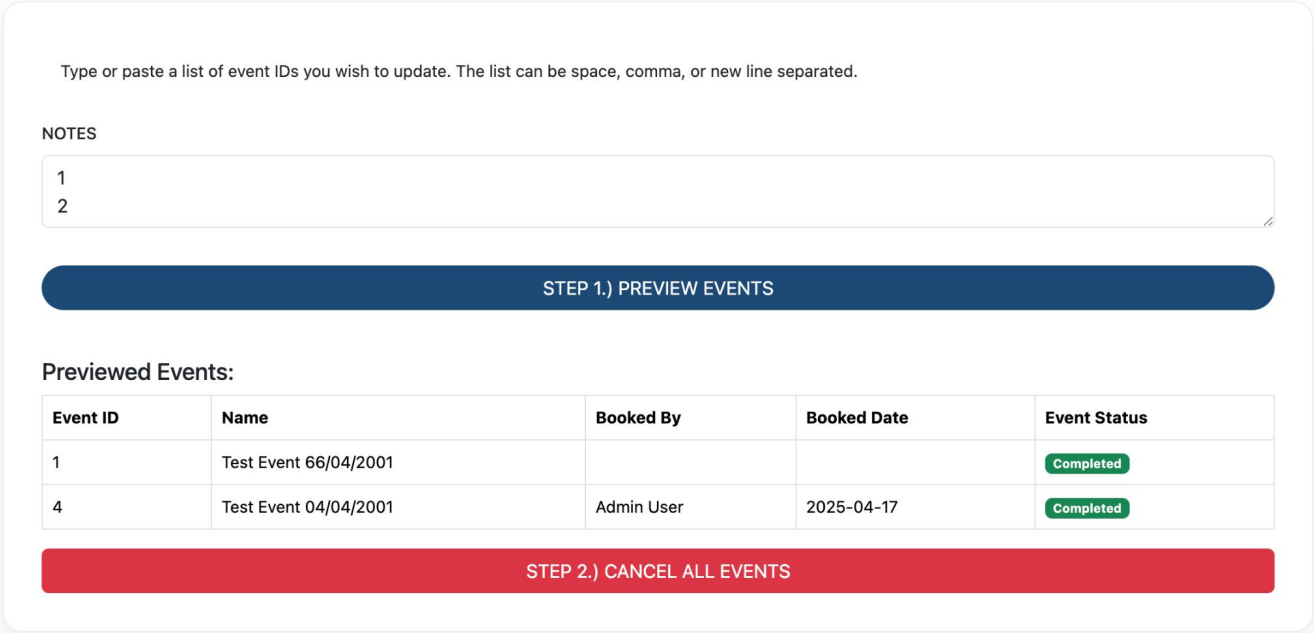

Are we missing “Manage Documents” from Events screen for Sell Sheets?

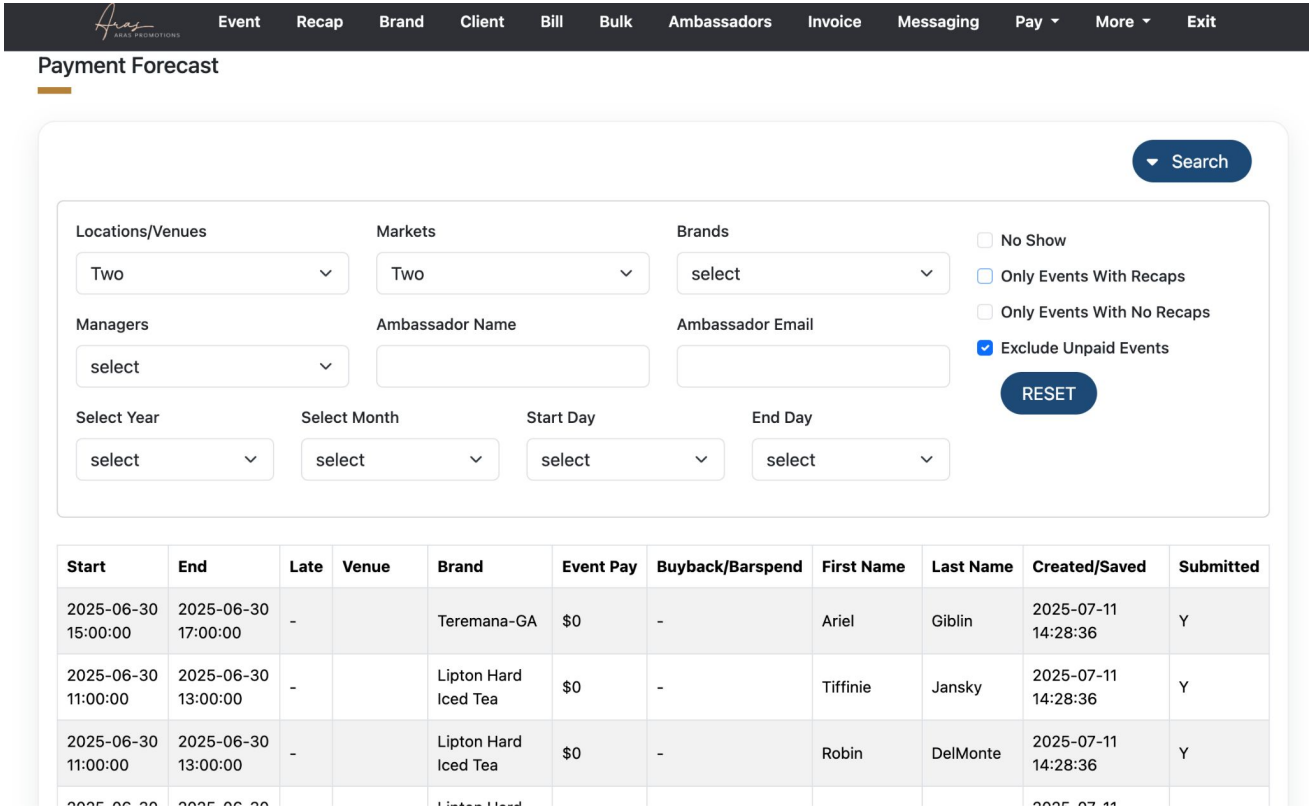

Attachments for events are pulling from our computer, not from the Portal documents

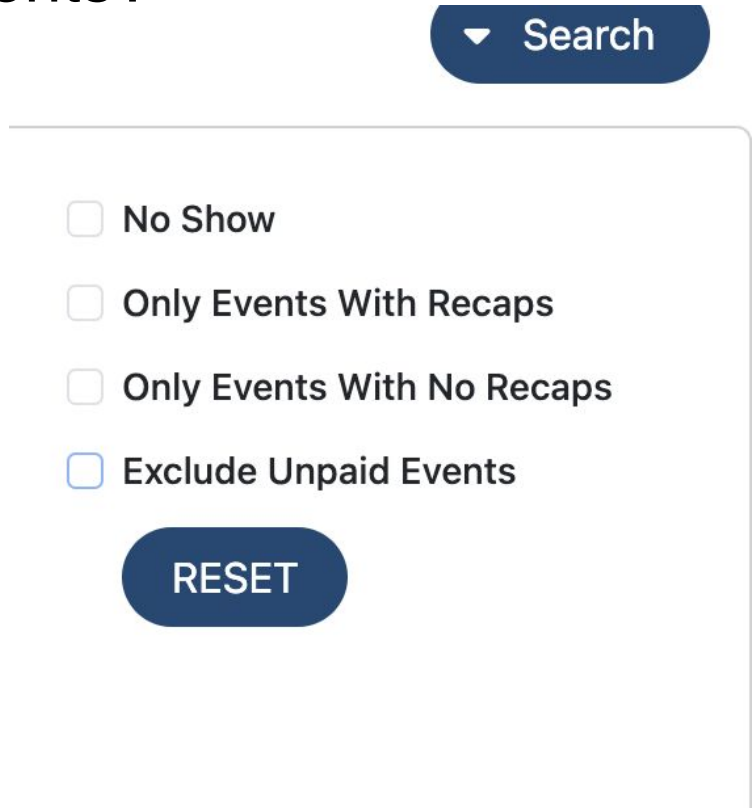

The only option under Bulk seems to be to Bulk cancel, can we add the other Bulk edit features?

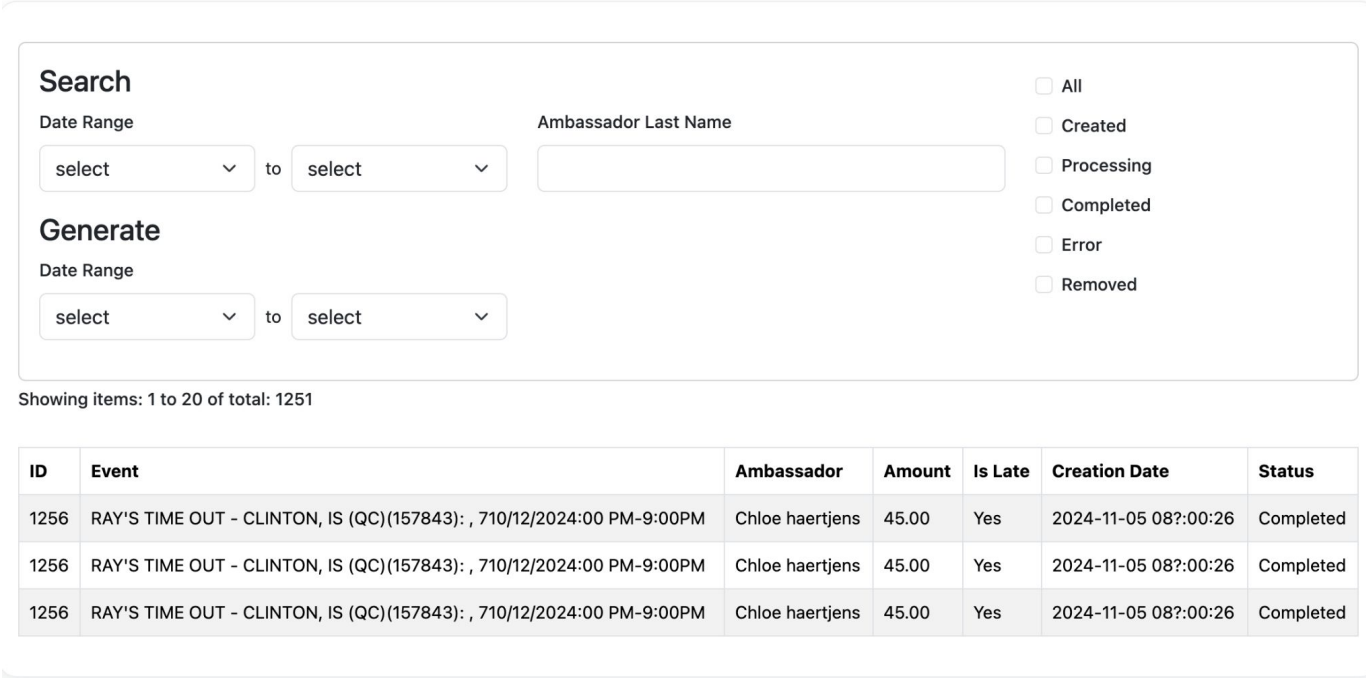

Can we add the option to Edit/View recaps from Pay Forecast?

Under Pay Forecast, is it possible to add a filter for “Pinata” pay events?

Under Payments tab, can we add a “Ambassador First Name” filter so it doesn’t pull multiple BAs with the same last name?

Under MORE tab: User Location

- I think we should change the name of this Login Option to “Store” instead of “Location”
- Grocery stores use our portal to login and see a schedule of their upcoming demos
- User Location is different than creating an event location but both look the same in the Beta
- User Location needs to have the option to choose what ‘locations” they User gets to see. See current portal
- Seems like Locations and Venue/Store Type is the same thing…we only nee one of these
