Events Available: Event Detail

Could this also state the manager for the event?

Events: Pending & Assigned

Need to see:

- Date
- Time
- Location
- Brand (already in there)

- Can the BA click into the event to see the “event details?”
- If there are more than 1 BA working, can they see the name of the other BAs? Can they message the other BA via the app?

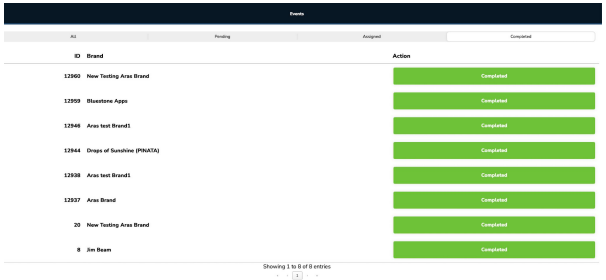

Events: Completed

Need to see the following info:

- Date/time
- Brand
- Location
- Event Pay

Need to be able to search filter by:

- Date range
- Markets

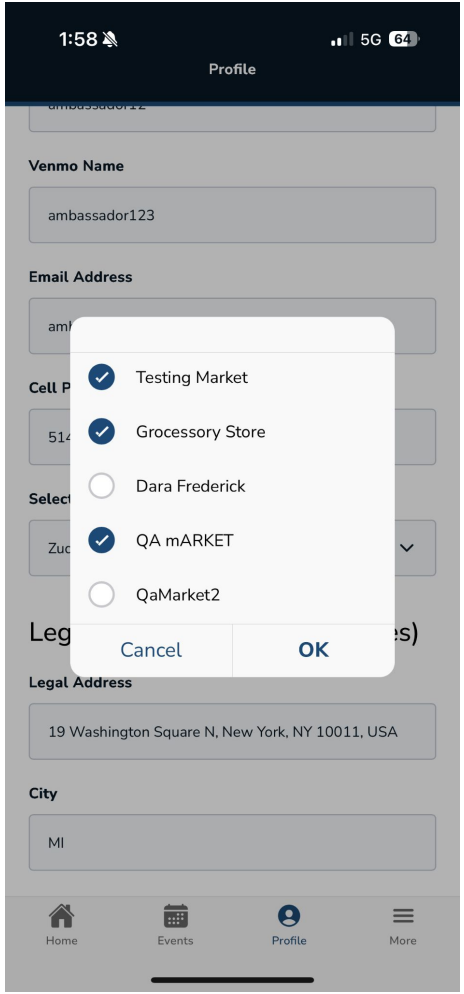

PROFILE

BA Info

We do not want our brand ambassadors to see what “Market” they are assigned to. Only admins/managers should see this info.

When I type in the address the city/state and zip did not autopopulate in.

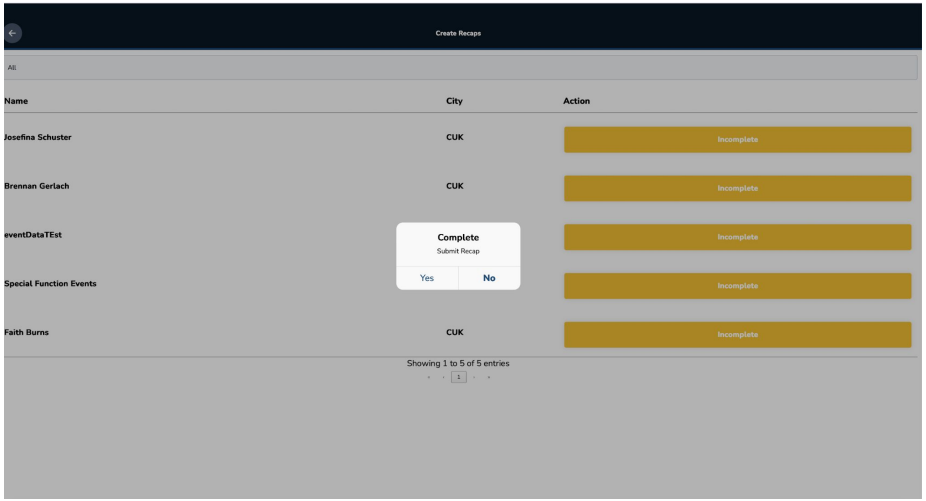

Profile

- Change First/Last name to read “Legal First Name, Legal Last Name.”
- Banking information is missing on profile

RECAPS

Create Recap

Under “Create Recap” When clicking on the recap, it does not take you anywhere to complete it. Can it display the recap to submit?

Submitted Recaps

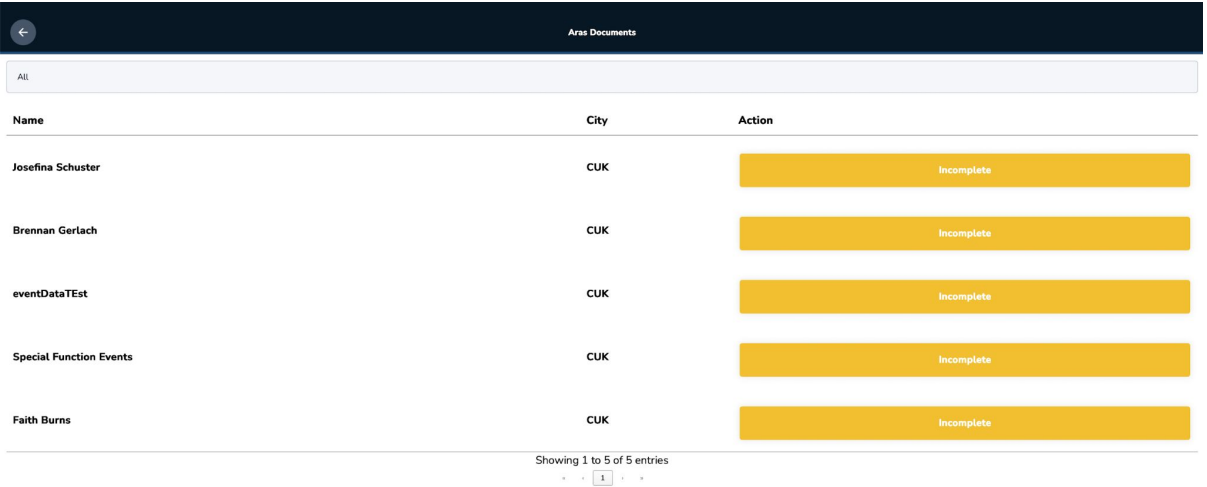

When more than 1 BA works, we only need 1 of them to fill out a recap form. If BA #1 fills out the recap form, can BA #2 see that it was submitted on their behalf?

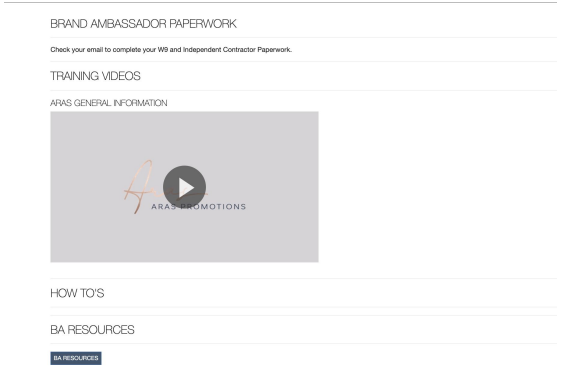

Can we make it an option to see which BA submits a recap on manager ends as well as BA end? I get many questions regarding if a recap was successfully submitted by a partner BA

Recaps

We discussed having automated reminders for recaps that are not submitted in time. Is that in the works?

MORE TAB

Under Aras Documents - It's showing the same info as under "Create Recap"

This should hold direction on the specific ambassador's paperwork, training videos, & BA resources. Might be worth having banking info setup here too

PAY FORECAST

Pay Forecast & Payments

- Pay Forecast is so the BA can see their upcoming pay for the next payperiod.
- Payments is so they can see all past payments received
  - They will need to filter payments by date
- Can the event pay be listed after brand?
- Instead of “First name” can the location be listed
- Summarized: BA will see the Location, brand, event pay for each event. If they need more details they will click the Action icon (which takes them to the recap).

Misc

BA Chat option?

Could there be a group chat that is separated by markets and managed by each market manager for BA’s to message in when looking to find coverage for events/ask questions to other BA’s?
